

## From the Vice-Chancellor's Desk

It gives me immense pleasure to put forth the newsletter of our University highlighting the major activities undertaken from January to June 2019.

Our university jointly organized VII<sup>th</sup> Pan Commonwealth Veterinary Conference at Bengaluru in association with Commonwealth Veterinary Association (CVA) and ICAR-NIANP during 3<sup>rd</sup> to 7<sup>th</sup> March 2019 and this conference provided an outstanding platform to the delegates for sharing, exchanging and gathering the current knowledge and future opportunities in the different fields of veterinary and allied sciences. International training programme on 'Dairy Processing' for Bangladesh nationals was organized by Dairy Science College, Bengaluru for two months. I am happy to note that Dr. N.A. Patil, Dean, V.C. Bidar and staff members Dr. R.G. Bijurkar and Dr. Ravindra B.G. participated and presented papers in III Asian Conference on Science, Technology and Medicine (ACSTM)-2019 held at Diera Dubai, UAE during 12-14<sup>th</sup> February 2019.

I am happy to state that with the motto of "Rural oriented and Farmer Friendly Activities," our University has made progression in all three-pronged endeavors Teaching, Research and Extension.

Several training programmes and workshops on scientific sheep and goat rearing, pig rearing, advanced dairy farming practices and clean milk production were conducted for farmers by Veterinary Colleges, Dairy Science Colleges and Animal

Husbandry Polytechnics. The pride of our University lies in the veterinary services extended to farmers, animals with modern facilities in our institutions. As far as fisheries activities are concerned open sea cage fish farming and mussel culture, eco-friendly sustainable aquaculture and improved methods for inland farming were also propagated by skill development training programmes by institutes of Fisheries Sciences.

Another feather to our University's accomplishments includes successful execution of World Bank aided KWDP-Sujala-III project in seven backward districts of Karnataka through livestock support and extension activities in farmers' fields itself. These success stories are becoming the 'Hot-spots' and are serving as the inspiration for other farmers to adapt. I hope that more and more such farmer oriented extension programmes and research activities will be undertaken in coming days to uplift the Animal Husbandry, Dairy and Fisheries sectors.
